

# WEBINAR: HACCP / GMP FOR FOOD/FEED TRANSPORT & STORAGE

# OUR PURPOSE

IS TO HELP  
CUSTOMERS  
DELIVER PRODUCTS  
THE WORLD CAN  
**TRUST**

NQA is a **world leading certification body** with global operations.

NQA specialises in certification in **high technology** and engineering sectors.

NEVER STOP IMPROVING

**50,000**  
CERTIFICATES  
GLOBALLY

**100%**  
ALL INCLUSIVE  
— FEES —

**1000+**  
EMPLOYEES  
WORLDWIDE

**AVERAGE  
CUSTOMER  
PARTNERSHIP**

**OPERATING  
COUNTRIES**

# CERTIFICATION AND TRAINING SERVICES

We specialize in management systems certification for:

QUALITY

AEROSPACE  
(QUALITY)

AUTOMOTIVE  
(QUALITY)

ENVIRONMENT

ENERGY

HEALTH AND  
SAFETY

INFORMATION  
RESILIENCE

FOOD SAFETY

RISK  
MANAGEMENT

MEDICAL  
DEVICES

# NATIONWIDE TRAINING SERVICES

ACCREDITED COURSES

Virtual Learning

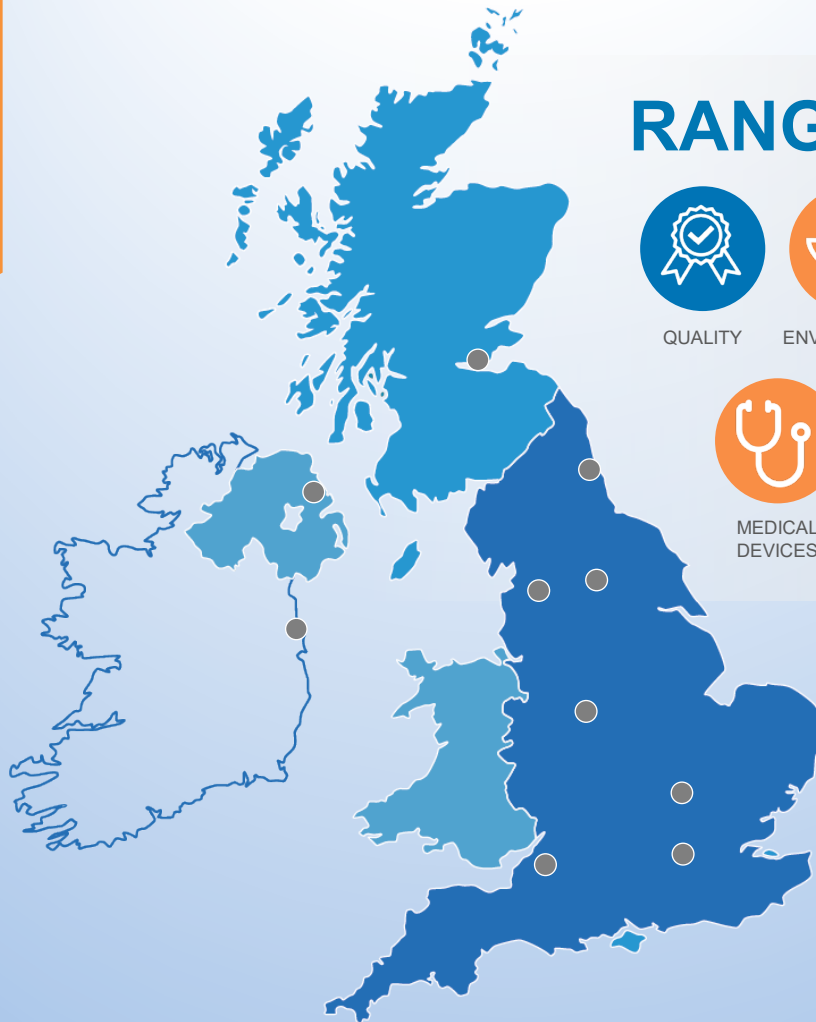

e-Learning / Live Webinars

In-house Training

Public Training Nationwide Locations

## RANGE OF COURSES

QUALITY

ENVIRONMENT

ENERGY

HEALTH AND SAFETY

INFORMATION SECURITY

MEDICAL DEVICES

BUSINESS CONTINUITY

AEROSPACE

INTEGRATED MANAGEMENT

- **e-Learning** Introduction
- **1 day** Introduction Courses
- **2 day** Implementation Courses
- **2 day** Internal Auditor – NQA or IRCA
- **5 day** Lead Auditor – NQA or IRCA
- **Advanced** Training

IRCA

APPROVED TRAINING PARTNER

NEVER STOP IMPROVING

## KEY INFO

- 30-45 minute webinar
- Questions in the chat box
- Q&A at the end
- Recording of webinar circulated shortly

# YOUR PRESENTER

## Maria Constable

ISO 22000, FSSC 22000

Food Certification Manager

Maria has worked in the certification industry for 15+ years, specialising in food safety for the food chain from farm to fork and worked with many different Standard owners, clients and stakeholders. Her role as Food Certification Manager is to oversee the accreditation and certification of NQA's Food Safety Management Systems Standards globally whilst ensuring technical knowledge and changes within the industry are cascaded accordingly to clients, stakeholders and NQA's auditors.

# WHAT WILL YOU LEARN?

---

- You will receive an overview of the GENERAL PRINCIPLES OF FOOD HYGIENE code of practice and it's relation to the transport and storage of Food & Feed
  - Tips and techniques for managing the requirements and ensuring continual improvement
  - Interpretations of the new or updated requirements
-

# WHAT IS HACCP?

---

HACCP is science based and systematic, identifies specific hazards and measures for their control to ensure the safety of food. HACCP is a tool to assess hazards and establish control systems that focus on prevention rather than relying mainly on end-product testing.

**- World Health Organisation -**

The HACCP Principles are incorporated into the Codex Alimentarius code of practice “General Principles of Food Hygiene” CXC1-1969

This is applicable to all organisations within the food chain

---

# HACCP FOR TRANSPORT & STORAGE

---

## Scope:

Organisations who offer transport OR storage for Food or Feed Products.

This part of the chain is very important.

It is the part of the chain where the products continue their journey to the next destination, whether that be a stopping point or moving to the next destination.

- Handling
  - Warehouse
  - Storage
  - Shipping
  - Air Cargo
  - Rail
  - Road
  - Distribution
  - Receipt
  - Dispatch
  - Loading
  - Unloading
  - Delivery
  - Transport
  - Logistics
-

Latest version was revised in 2020, previous version was issued in 2003

At NQA we are in the process of adopting the new code of practice when auditing our Food Safety Certified clients.

## What are the changes?

- There are some wording changes to definitions, such as “loss of control” has been replaced with “deviation”.
- Update (highlighted) to the 7 principles wording:

**PRINCIPLE 1** Conduct a hazard analysis **and identify control measures.**

**PRINCIPLE 2** Determine the Critical Control Points (CCPs).

**PRINCIPLE 3** Establish **validated** critical limits.

**PRINCIPLE 4** Establish a system to monitor control of CCPs.

**PRINCIPLE 5** Establish the corrective actions to be taken when monitoring indicates **a deviation from a critical limit at a CCP has occurred.**

**PRINCIPLE 6** **Validate the HACCP plan and then establish procedures for verification to confirm that the HACCP system is working as intended.**

**PRINCIPLE 7** Establish documentation concerning all procedures and records appropriate to these principles and their application

NEVER STOP IMPROVING

## REVISION 2020

---

Positive Food Safety Culture has been integrated into the requirements mainly under the section for Management Commitment to Food Safety. It has been increasingly proven that many food safety incidents could be avoided if the food safety culture and leadership commitment is good.

Also, within the industry we still refer to GMP (Good Manufacture Practice) but this should now be referred to as GHP (Good Hygiene Practice). I think the main reason for this is that the code of practice is applicable for all stages of the food chain, not just the manufacturer.

---

# DEFINITIONS

This is a section people often do not read!

It is important to understand the meaning of these words, processes in the context of the code of practice document.

CXC 1-1969

5

## DEFINITIONS

For the purposes of this document the following definitions apply:

**Acceptable level:** A level of hazard in a food at or below which the food is considered to be safe according to its intended use.

**Allergen cross-contact:** the unintentional incorporation of an allergenic food, or ingredient, into another food that is not intended to contain that allergenic food or ingredient.

**Cleaning:** The removal of soil, food residues, dirt, grease or other objectionable matter.

**Competent Authority:** The government authority or official body authorized by the government that is responsible for the setting of regulatory food safety requirements and/or for the organization of official controls including enforcement.

**Contaminant:** Any biological, chemical or physical agent, foreign matter or other substances not intentionally added to food that may compromise food safety or suitability.

**Contamination:** The introduction or occurrence of a contaminant in the food or food environment.

# CODE OF PRACTICE LAYOUT

## Chapter ONE - GOOD HYGIENE PRACTICES

Section 1 – INTRODUCTION AND CONTROL OF FOOD HAZARDS

Section 2 – PRIMARY PRODUCTION

Section 3 - ESTABLISHMENT - DESIGN OF FACILITIES AND EQUIPMENT

Section 4 - TRAINING AND COMPETENCE

Section 5 - ESTABLISHMENT MAINTENANCE, CLEANING AND DISINFECTION, AND PEST CONTROL

Section 6 - PERSONAL HYGIENE

Section 7 - CONTROL OF OPERATION

Section 8 - PRODUCT INFORMATION AND CONSUMER AWARENESS

Section 9 - TRANSPORTATION

## Chapter TWO - HAZARD ANALYSIS AND CRITICAL CONTROL POINT (HACCP) SYSTEM AND GUIDELINES FOR ITS APPLICATION

Section 1 - PRINCIPLES OF THE HACCP SYSTEM

Section 2 - GENERAL GUIDELINES FOR THE APPLICATION OF THE HACCP SYSTEM

Section 3: APPLICATION

### Annex 1 - Comparison of control measures with examples.

Diagram 1 – Logic Sequence for Application of HACCP

Diagram 2 – Example of Hazard Analysis Worksheet

Diagram 3 – Example of a HACCP Worksheet

NEVER STOP IMPROVING

# GMP/GHP??

---

Within the food industry, we refer to GMP (Good Manufacturing Practice), this is a term which is widely recognised and understood. But when referring to Food Safety, this term is increasingly being replaced with GHP (Good Hygiene Practice).

For organisations who are not manufacturing it makes the term more relatable.

---

NEVER STOP IMPROVING

# HACCP PRINCIPLES

---

- **PRINCIPLE 1** - Conduct a hazard analysis and identify control measures.
  - **PRINCIPLE 2** - Determine the Critical Control Points (CCPs).
  - **PRINCIPLE 3** - Establish validated critical limits.
  - **PRINCIPLE 4** - Establish a system to monitor control of CCPs.
  - **PRINCIPLE 5** - Establish the corrective actions to be taken when monitoring indicates a deviation from a critical limit at a CCP has occurred.
  - **PRINCIPLE 6** - Validate the HACCP plan and then establish procedures for verification to confirm that the HACCP system is working as intended.
  - **PRINCIPLE 7** - Establish documentation concerning all procedures and records appropriate to these principles and their application.
-

# APPROACH FOR TRANSPORT & STORAGE ORGANISATIONS

---

- Create a flow diagram of the activities carried out - consult all levels of the organisation to enable capture of all steps.
  - Identify all possible food safety hazards at each step. Do not worry about the flow diagram being too large, you can always consolidate later on.
  - **Once you have done this, you can then work through the HACCP Principles.**
  - **After HACCP Principles, double back and work through **CHAPTER ONE**.**
-

# PREPARATION FOR AUDIT

---

- Conduct internal audits – someone independent of the process is best.
- Have HACCP Team Meetings - Regularly review procedures and verify controls of hazards as well as review of the whole system after EVERY change.
- Once your system is established, think about getting it certified.

Integrated into ISO9001  
ISO22000 HACCP  
FSSC22000

---

# CONTINUAL IMPROVEMENT

---

- Food Safety Hazards are changing all the time
  - Continually strive to improve your system
  - Not all hazards are eliminated, therefore, can the controls be improved?
  - We never saw that a global pandemic could effect Food Safety, but organisations have had to adapt working processes and procedures to meet COVID SECURE requirements – what was the impact relating to managing food safety hazards? Or did this new way of working create new hazards?
-

# NEW FOOD SAFETY TRAINING COURSES

- Food Labelling & Legislation
- HABC Level 2 Award in HACCP for Food Manufacturing (RQF) - IN-HOUSE
- Understanding & Implementing TACCP & VACCP
- Internal Auditor Training
- HABC Level 3 Award in HACCP for Food Manufacturing (RQF)
- HABC Level 3 Award in Food Safety in Manufacturing (RQF)
- ISO 22000:2018 Lead Auditor Training
- HABC Level 4 Award in HACCP for Management (CODEX Principles) (RQF)

# ADVANCED TRAINING COURSES

- Leadership within ISO
- Effective management of change
- Managing your supply chain relationships
- Effective evaluation of compliance
- How to identify risks & opportunities
- Participation & consultation of workers
- Demonstrating customer satisfaction
- Managing information security remotely
- GDPR – How to think like a DPO
- Operational resilience planning
- Risk / process based auditing
- Effective root cause analysis
