YOUR PRESENTER

Paul has over fifteen years' experience working with multiple Management Systems in a variety of industry types. In this time, he has built relationships with universities, accredited certification bodies and many companies to develop a comprehensive understanding of these subjects. Paul also has recognised teacher status at Cranfield University where for the past 10 years he has been a visiting lecturer, speaking on ISO Standards to Masters and PhD students.

NEVER STOP IMPROVING

WHAT WILL YOU LEARN?

This session aims to talk about the experience AvISO has gained over its 10 years of providing consultancy and Software, to help you get the most from your management system and avoid unnecessary non-conformities. We will also look at ways to ensure that your management system adds value to your business.

Dr Paul Stevens **shared a post:** Don't forget to register to join AvISO Consultancy Ltd and NQA for our webinar on 'Keeping Your Man...

System
Maturity

FOCUS & HONESTY

Focus on the Standard & watch out for scope creep

Be clear on what your motivations are

Ensure processes & procedures are correct

Be honest when defining risk & opportunities

Set the objectives you want to meet

Share the positive & the negative

Provide a true representation of the organisation

DUPLICATION & CENTRALISATION

Integrate Systems

Don't keep several copies of the System in different locations

Use the Management System to signpost out across the organisation

Define Roles & Responsibilities

Coordinate Audits and Management Review

COMPLEXITY & LANGUAGE

No need to write like a Standard, use language that will be recognised

Use diagrams

Do the hard work at the start

Involve everyone but only share what is relevant

Don't try and proceduralise everything

Be able to accommodate future growth of the organisation

Consider influence & Risk – it should not put you out of business

AVAILABILITY

All management system tools in one place

Be consistent

Integrated software

Signposts to records and evidence across the organisation

ISO 50001 ENERGY

A legal register is a form of document or system that details legislation that an organisation must be compliant with, due to the activities it carries out.

The legal register might only contain legislation of a certain type, for example, environmental or health and safety legislation. The range of laws that apply can vary greatly depending on the type and size of an organisation and the industry it works within, as well as depending on where it is based.
