

Benefits of Integrating Your Management Systems

Terry Fisher & Richard Walsh

5th November 2021

OUR PURPOSE

IS TO HELP
CUSTOMERS
DELIVER PRODUCTS
THE WORLD CAN
TRUST

NQA is a **world leading certification body** with global operations.

NQA specialises in certification in **high technology** and engineering sectors.

AMERICA'S NO.1

Certification body in
Aerospace sector

TOP 3 IN THE UK

ISO 9001, ISO 14001,
ISO 45001, ISO 27001

CHINA'S NO.1

Certification body in
Automotive sector

GLOBAL NO.1

Certification body in
telecommunications and
Automotive sector

GLOBAL NO.3

Certification body in
Aerospace sector

UK'S NO.2

Certification body in
Aerospace sector

- Recording of webinar circulated shortly

YOUR PRESENTERS

Terry Fisher

ISO 9001, ISO 14001, ISO 45001,
EcoCampus, IOSH

**NQA Occupational Health
& Safety Principal Assessor**

Terry boasts an impressive length of service in a large variety of public and private organisations and industries. Including the likes of: Automotive; Heavy Engineering; Medical Manufacturing; General Manufacturing; Wallcovering & Printing; Educational Estates and Transport and Logistics.

Richard Walsh

CEnv MIEMA, ISO 9001, ISO 14001,
ISO 50001, NHSS 18, Eco-Campus

**NQA Principal Assessor
Environment & Energy**

Richard is NQA's Principal Assessor for ISO 14001 and ISO 50001 management system standards. As a Principal Assessor his role is to lead and develop the technical knowledge and skill base of NQA staff and Assessors, whilst ensuring technical knowledge and changes within the industry are cascaded appropriately and accordingly to clients and external stakeholders.

WHAT WILL YOU LEARN?

- Objectives
 - Annex SL & PAS 99
 - Combinations of standards
 - Why integrate standards?
 - The benefits of integration?
 - How to think of integration
 - Common and different areas - discussion
-

ANNEX SL

- Annex SL published in 2011, provides the high-level structure for ISO management systems standards - it replaced the historical ISO Guide 83 and expanded on the base structure already implemented.
- It creates identical core text and common terms and definitions.

This has:

- Streamlined standards
- Encouraged standardisation
- Eased the integration of management systems.

Annex SL

- Clause 1 - Scope
 - Clause 2 - Normative references
 - Clause 3 - Terms and definitions
 - Clause 4 - Context of the organization
 - Clause 5 - Leadership
 - Clause 6 - Planning
 - Clause 7 - Support
 - Clause 8 - Operation
 - Clause 9 - Performance evaluation
 - Clause 10 - Improvement
- A red bracket groups Clauses 4 through 10, with the label **Auditable Clauses** to the right.

Where possible the clauses have identical core text, no matter which Standard they are applied to, and share common terms and core definitions.

PAS 99 - PUBLICLY AVAILABLE SPECIFICATION FOR COMMON MANAGEMENT SYSTEMS

- Published by BSI in 2006 - allows streamlining of management systems.
 - Current version PAS 99:2012
 - Highlights the common elements and how to integrate them:
 - Meet all standard requirements with one set of policies and procedures
 - Audit more than one system at a time to save money and resources
 - Improve overall efficiency by removing the need to duplicate tasks
 - Clearly defined roles and responsibilities highlight common objectives
 - Make it easier to continually improve all your management systems
-

COMBINATIONS OF STANDARDS

Some popular combinations:

ISO 9001 + ISO
14001

ISO 9001 + ISO
45001

ISO 14001 +
ISO 45001

ISO 14001 +
ISO 50001

ISO 9001 + ISO
14001 + ISO
45001

ISO 9001 +
14001 + 45001 +
50001

NEVER STOP IMPROVING

NEW STANDARDS

Over the last 10 years the number of management systems has increased greatly.

- ISO 50001:2018 - Energy Management
 - ISO 22301 – Business Continuity Management
 - ISO 27001:2013 - Information Security Management System
 - ISO 22000:2018 - Food Safety Management Systems Certification
 - ISO 13485:2016 - Medical Devices
 - ISO 31000:2018 - Risk Management
-

SO WHY INTEGRATE?

How many company managers would like?:

- Better utilisation of resources
- Less bureaucracy
- All areas of the organization aligned and delivering company-wide objectives
- To improve and make things more effective and efficient
- The organization working as a team
- No delays or backlogs
- Clear responsibilities and authorities
- Clarity in the processes of the organization
- Management and oversight made simpler
- To identify and prioritise improvements
- Less in-fighting/barriers between departments

SO WHY INTEGRATE?

How many staff would like?:

- Less frustration
- Less paperwork
- A better understanding of what they do and how it fits the bigger picture
- To feel part of a team
- To know what they are responsible for
- How to play their part
- To not make the same mistakes over and over

SO WHY INTEGRATE?

So then:

If both managers and staff want those things then why in most organizations do they often not support the development and implementation of an integrated management?

What does integration do?

- Enables the organization's mission and objectives to be achieved
- Defines all the processes and interfaces of the organization
- Integrates all activities, objectives and processes into one system
- Provides clear accountabilities and responsibilities
- Enables processes, people and resources to be aligned
- Enables consistency of product
- Controls the spurious generation of documents
- Forms a basis for training
- Provides management with a tool to assist in their oversight role
- Helps identify what needs improvement

INTEGRATION

It seems therefore that developing an integrated management system would appear to be common sense.

The problem with common sense is it isn't too common.

Discussion

WHAT SHOULD WE BE THINKING ABOUT?

Considerations should include:

- The extent to which integration should occur
 - The cultural aspects of the business & its management style
 - Levels of competency within the business
 - Legislative and other requirements (including customers)
 - Setting of clear objectives for integration project
-

PLAN-DO-CHECK-ACT (PDCA)

Plan

Establish what needs to be achieved and organise resources

Do

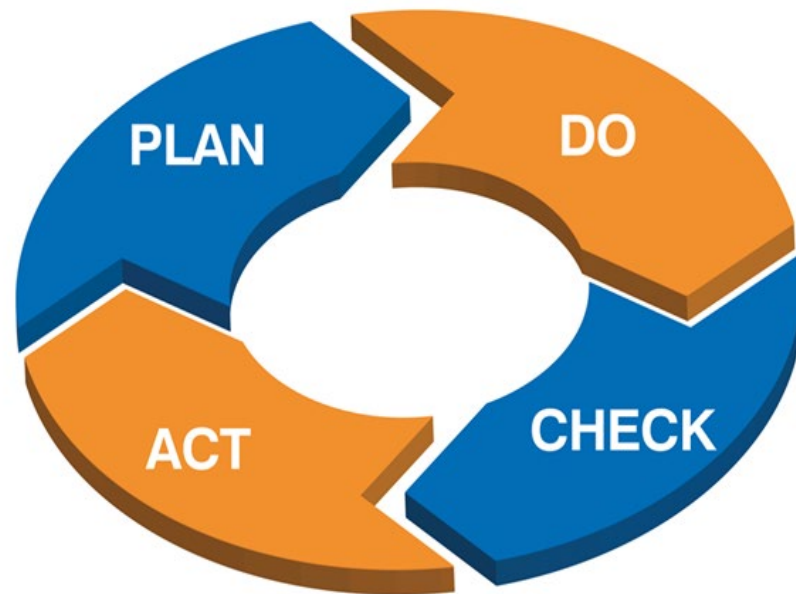

Implement the processes

Check

Monitor and measure the processes and their outputs

Act

Respond to findings from the checking activities in order to improve

INTEGRATED SYSTEM

COMMON ELEMENTS - DISCUSSION!

- **Clause 4** - Context and needs of interested parties
 - **Clause 5** - Leadership, policy, roles and responsibilities
 - **Clause 6** - Risks & opportunities, compliance obligations, objectives & planning
 - **Clause 7** - Support, resources, competence, communication & awareness, documented information
 - **Clause 10** - Improvement, NC and corrective action, continual improvement
-

AREAS OF GREATEST DIFFERENCE

- **Clause 8** - Operational Planning/Controls and Emergency Preparedness
 - **Clause 9** - Monitoring, measurement, analysis, evaluation, evaluation of compliance, internal audit, management review
-
